PSD Permit Application

Michael M. Johnston, Acting Chief
Air Compliance Evaluation Section M/S 513

Robert G. Courson, Chief
Research & Training Technical Support Branch

On August 2, 1978 we received an application from the Atlantic Richfield Company for a PSD permit to construct natural gas turbines and various support equipment at the Prudhoe Bay Oil Field. The plant is located in the North Slope Borough.

Please review the application for completeness. In addition, determine for which criteria pollutants BACT is necessary and for those pollutants requiring BACT, determine if the proposal employs the necessary technology. Identify any problems of a policy nature as early as possible so their resolution will not unnecessarily delay the review process.

In order to expedite this request, please feel free to contact the Company directly for any information you need. You may also want to schedule a meeting between key Company personnel and EPA staff. Any correspondence between EPA and the Company should be routed through me for the purpose of keeping our records straight.

We are attempting to respond to PSD applications within 30 days of receipt with a determination as to the completeness of that application. In this regard, please reply at your earliest convenience, but not later than September 1, 1978.
